

MOHR 80 PLUS

Reference: WGM1385|ITEN

Brand: MOHR

Model: 80 PLUS

Age c.: 2021

Serial Number: 90N1204

Max Size mm: 800

Product description:

The machine is operated via an ergonomically arranged 18.5" touch-sensitive display. Repeat sequences can be saved and adapted at any time. To do so, the system has 1,998 memory positions available. Due to digital workflow integration Compucut® takes the cutting data supplied as ppf or jdf files direct from the prepress stage. Compucut® generates the cutting program automatically. In order to start the cutting program automatically, the machine is furnished with a bar-code reader. This allows setup times to be reduced to almost zero. The process visualization gives the operator a graphic indication of the material handling. This minimizes the proneness to errors considerably.

Functions:

- Low-profile keyboard with easy-to-understand symbols
- Menu-driven knife change
- Programming during cutting
- Block programming available
- Format tables
- 198 program memory locations
- Program information with plain text
- Cutting cycle shown with symbols
- Programmable jogging mark
- Clamping time before cutting
- Clamping without cutting
- Programmable ejector
- Protect program
- Lubrication interval signal
- Prepress data is taken as a basis for generating cutting programs (P-Net Service Compucut®)
- A bar-code reader facilitates easy loading of cutting programs
- Process visualization for a graphic indication of material handling reduces the proneness to errors
- Production report for acquiring the machine performance data
- 1,998 Program memory positions
