

## HOHNER EXACT

Reference: WGM1470|

**Brand:** HOHNER

**Model:** EXACT

**Serial Number:** 01007914

### Product description:

This multi head wire stitching machine for mixed applications is characterised by:

Equipped as standard with Universal 52/85 stitching heads. It is possible to fit up to four of these heads to the machine.

Standard and loop stitching or mixed applications

Perfectly suitable as a stand-alone machine, for the completion of a whole system and/or test unit

Maximum stitching thickness 8 mm for standard stitching

Easily convertible stitching table from pad stitching (flat) to brochures (saddle)

Many varieties of exchange parts sets for a wide range of staple options are available to fit at a later stage.

Simultaneous and central adjustment of stitching thickness and wire length of all heads with only one lever

A backstop and two side lays are fully adjustable for accurate and easy positioning of the staples.

Extremely easy for the operator to change from one format to another.

Perfectly suitable for small production runs, sample stitching or offline applications

Maximum stitching per head: 206 staples per minute

Table size 550 x 280 mm.
