

## PERFECTA 115 TVC

Reference: WGM1583|ITEN

**Brand:** PERFECTA

**Model:** 115 TVC

**Age c.:** 2001

**Serial Number:** 72898

**Max Size mm:** 1150

### Product description:

More than one hundred years of experience have produced the necessary know-how to build high-speed guillotines at such a high technical level. Perfecta high-speed guillotines show many advantages such as an outstanding basic mechanical concept (extremely twist-free single-piece machine frame, closed cutting table, robust knife drive) and an effective knife changing device combined with efficient and user-friendly operation. These properties guarantee universal applicability in cutting sheet materials both in the form of piles or in single. Non-wearing and non-contact proximity switches in conjunction with the servo drive assembly used are further guarantors for rapidity and precision. Even for solutions up to fully automatic cutting work systems, Perfecta high-speed guillotines are suited best.

Cutting width mm 1150

Useful rear table length mm 1150

Feed height mm 165

Min. scrap width mm 20

Clamping force kN 2.5 - 45

Main drive power kW 4,0

Table height mm 870

Net weight kg 3200
